PROFESSIONAL SUMMARY

Advanced Information Systems Engineering student (UTN), oriented toward the Functional Analyst role. Hands-on experience building complete web applications —from requirements analysis and feature design to implementation and deployment— providing an integral view of business processes and the technical feasibility of each solution.

Skilled in gathering and documenting functional requirements, modeling processes, and designing relational (SQL) databases. Proficiency in development tools (Angular, Spring Boot, Node.js, Git) and deployment on Cloudflare, applied in personal projects. Currently seeking a Functional Analyst opportunity, also open to Backend and Fullstack development roles (Junior or trainee).

TECHNICAL SKILLS

Requirements analysis, Functional documentation, Process modeling (UML), SQL (MySQL, PostgreSQL), Cloudflare, Git, REST APIs, Angular, TypeScript, JavaScript, Node.js, Spring Boot.

EXPERIENCE

Fullstack Developer | Personal Projects

2024 – Present

- Gathered and analyzed requirements for the development of web applications (event management, e-commerce store, user management).
- Designed and documented functionality: use cases, roles, flows and business rules.
- Designed relational database schemas and queries with MySQL and PostgreSQL.
- Implemented frontend and backend (Angular, Spring Boot, Node.js) following best practices.
- Deployed applications to Cloudflare (Cloudflare Pages).
- Continuous learning through courses (Angular & Spring Boot, Node.js, Argentina Programa) applied to real projects.

Multimedia Technical Lead | Seventh-day Adventist Church – Santa Fe

2020 – Present

- Managed and executed live streaming productions using OBS.
- Configured streaming workflows for YouTube broadcasts.
- Led technical setup and troubleshooting of audiovisual systems.

PROJECTS

Rincón Parfums Generator | E-Commerce Store Editor

- Developed a static store editor for the Rincón Parfums brand, with auto-save.
- Generates and publishes the online store (rinconparfums.com.ar) deployed on Cloudflare Pages.
- Desktop application built with Electron and Node.js, with a Windows installer (NSIS).

[Demo](#) | [Code](#)

InviTab | Event Management Web Application

- Developed a web application for managing guests, groups and tables for events.
- Implemented CRUD with Angular and signals, with data persistence in localStorage.
- Guests assigned to tables through drag and drop and a dashboard with charts (Chart.js).
- Data synchronized between devices through JSON export and import, deployed on Netlify.

EDUCATION

Bachelor's Degree in Information Systems Engineering (In Progress) · 16/36 subjects passed · 5 currently enrolled

Universidad Tecnológica Nacional (UTN), Argentina

2022 – Expected 2029

GPA: 7.14 / 10

Relevant coursework: Information Systems Design, Database Systems.

CERTIFICATIONS

- JavaScript Programmer – Edutin Academy (2024).
- Web Development with Node.js – Edutin Academy (2024).

LANGUAGES

- English: B1
